RE: Safety Light Corporation Site
Bloomsburg, Pennsylvania

Dear Mr. Steinmetz:

This letter is in follow-up to our conversation on Tuesday, September 13, 2005. The Georgia Institute of Technology ("Georgia Tech") Radiation Safety Office ("RSO") Nazia Zakir, and his staff reviewed archives records from 1958 to 1970 (Georgia Tech does not have any records prior to 1958). He specifically stated that he looked for inventory records to see if Foil was an inventoried item on researches radioisotope inventory and shipment records to see if it was shipped as waste or to shippers to Safety Light Corporation or its predecessor or affiliated companies.

Further, he spoke with Georgia Tech's former Director of Neely Nuclear Reactor Center and the former RSO, Bob Boyd. They had no recollection of such activity. The RSO in 1953 was Randall Carter who is now deceased.

In addition, Georgia Tech Experimental Station, which is now in a Georgia Tech Department known as the Georgia Tech Research Institute, has no records relating to this matter. We do not know what the record retention schedule was in 1953.

I trust this answers the inquiries, please do not hesitate to contact me if you have additional questions.

Sincerely,

A handwritten signature in black ink that reads "Gary Wolovick".

Gary Wolovick
Senior Attorney

C: Nolan Hertel, Director Neely Nuclear Research Center
